PRODUCT SHOWCASE: HOME INSPIRATION

“Extend your typical closet area and add a nook to incorporate visual interest and functional storage. Here, I created a space for keys, extra out-of-sight seasonal items and larger drawers for hats, scarves and mittens. Think vertical for more storage with hooks for hats and jackets and decorative baskets for extra storage for items used daily.”

Living room

"When faced with a room that has limited built-in storage space, I always try to find opportunities with clever furniture that will double as storage. In this living room, I strategically selected this stylish geometric coffee table that lifts up to store extra throws, games, books and kids' toys, without cluttering up this living space." – **Designer Amanda Shields, Amanda Shields Design**
